MAIN STREET --- BOW ISLAND

The School attendance now totals  
156 It is expected that this will be con-  
siderably increased during the coming  
month. Of this number 12 are High  
School students and 12 in grade 8 or  
entrance class

A Teachers' Convention for the dis-  
trict will be held at Medicine Hat on  
the 14th. and 16th. inst. It is expect-  
ed that all the local staff will be in at-  
tendance and the School will accom-  
ingly be closed on these dates

## An Answer To "One Interested"

The Editor does not hold himself re-  
sponsible for views of Correspondents

To the Editor  
Bow Island Review  
Dear Sir,

Would you be good enough to  
allow me space in your nice paper  
(which we always think of as the  
"Home-maker")

I am writing for myself and several  
others in reply to "One Interested"  
In the first place, the whole tenor  
of his epistle shows a great fondness  
for the degrading Liquor Traffic—an  
old saying has it, "Show me the writing  
of a man and the sort of looks he  
reads, and you can, easily tell what  
kind of a man he is," therefore all can  
judge what class of a man he is that  
"Supplicates for Drink"

He commences to class himself "As  
one apparently unable to look after  
himself," he unconsciously "admits  
the Truth when he says that; because  
when he and others stand on the  
quick - sands of Liquor, they  
are unable to look after themselves  
and often have "to be put to bed by  
friends or taken to Jail by policemen"  
It would appear that "One Interest-  
ed" would hate to have the Women  
vote against his beloved "Drink," he it  
either Beer (of which he speaks so  
innocently) or may be something  
hotter and stronger in the form of  
Whiskey etc.

We are willing to wager that if  
"One Interested" is a married man, he  
has a wife who is a true woman, a  
side of and for the cause of "Drink"  
because we presume she would be a  
true woman and would at once with a  
woman's keenness, recognize the  
Sophistry of his "Appeals for Drink"  
as they strike at the very foundations  
of their own little home (their nest)  
and of any possible happiness in that  
home, with deplorable results to their  
children, bringing them up in an  
atmosphere of callous indifference to  
"Drink" and all its debasing influences  
And as to his argument about Boot-  
legging and Illicit Stills, if there is an  
overwhelming Vote by the people in  
favour of Prohibition, then the  
Government thus Lawed by the People  
will see that the Law is more rigidly  
enforced, and the Bootlegger and all his  
kind will have "a hard road to travel,"  
a lot harder than it has been in the  
past. Men and women are not so  
divided in their opinions on the great  
questions of the day as "One Interest-  
ed" would like us to believe

So I go on the side of "A Mother in  
A Woman's Appeal to Women"  
and also urge with all my heart,  
that all Men and Women will Vote  
for Prohibition and Happiness

A Wife

## Bow Island

From our own Correspondent

The High School Literary Society  
held its first meeting on Friday even-  
ing last in the class room. There was a  
good turn out and a most enjoyable  
programme was presented. The meet-  
ings of the Society will be held every  
Friday evening in the School. Parents  
and friends of the students will be  
welcome at any of these meetings

Mrs. Schille was a business visitor  
in Bow Island this week

Mrs. F.J. Brophy who has been  
visiting Bow Island her former home,  
and looking after the farm here, re-  
turns to the Coast next Monday, she  
is quite a well known lady and it has  
been a great pleasure to many who  
knew her to have her here for a time.  
In honour of her visit and to bid her  
goodbye Mrs. Archie Mac Houlgin gave a  
very nice reception at her home last  
Tuesday afternoon, at which thirty  
ladies were present

Mrs. C. Carlson assisted the Hostess  
in welcoming and showing the ladies  
in, Mrs. Swennumson presided at the  
tea table, Mesdames M.D. Schornert  
R.S. Beattie and E. Willmott assisted  
in handing round the dainty cakes,  
sandwiches etc. the tables were very  
prettily decorated with sweet-peas  
and ivy (the ivy being sent from the  
Coast) a most enjoyable time was  
spent by all, and we are sure that  
Mrs. Brophy will return to the Coast  
with very warm feelings for all her  
many friends in Bow Island

## Card of Thanks

Mr. and Mrs. W.S. Knox and  
Mr. and Mrs. Allen Egan and  
family wish to convey their  
thanks to all kind friends, more  
especially those that so kindly  
assisted during the illness and  
at the death of their dear son  
John Raymond

John Raymond Knox the beloved  
son of Mr. and Mrs. W.S. Knox died  
last Thursday September 23rd. The  
funeral service took place at the  
house on Saturday, the Rev. V.M.  
Without speaking

"The Review tenders its deepest  
sympathy to Mr. and Mrs. W.S. Knox,  
in the great loss they have suffered, in  
the loss of their beloved little son  
"Suffer little children to come unto me  
And forbid them not  
For of such is the Kingdom of Heaven  
Unless ye become as a little child  
Ye cannot enter the Kingdom of  
Heaven"

The outstretched arms of Jesus, will  
love and bless this little child

## Guerilla Warfare In Ireland May Lead to Reprisals

Dublin.—Gen. Sir Neville MacCreedy, Commander of the military forces in Ireland, in an interview declared that the reprisals for the assassination of police taken at Balbriggan by the "Black and Tans," elsewhere, by the regular police or militia were actuated by any set of policy formulated by the government. He declared, however, that if the guerilla warfare of the Irish "republican" army continued, the situation might become such that reprisals would be necessary. He made clear the position of the militia forces in Ireland, saying that they had nothing to do with the administration of the Royal Irish Constabulary and its British auxiliary, the "Black and Tans," other than to give them necessary support in carrying out their police duties.

When I came to Ireland," Gen. MacCreedy said, "the idea got abroad that I came in the company of a kind of 'Pook'-like crowd, with the police as well as the militia. The Irish people are mistaken." It was not asserted by Gen. MacCreedy that there have been reprisals by the police and militia. On the contrary he explained why reprisals occurred saying that any army would take these actions by the spirit which led them. If the police were able to give them necessary support, there would be no need of the presence in Ireland of "Black and Tans," or militia and continued trouble, but it is a matter of time before the situation becomes so serious that reprisals have been spontaneous."

### Ration Hard Coal in U.S.

Boston, Mass.—Rationing of hard coal for domestic use was ordered as a means of relieving the scarcity which exists in all parts of the country.

Eugene C. Hultman, chairman of the state commission on the necessities of life, after a conference with a committee of coal dealers, appointed by Governor Coolidge, announced that until further notice households will be allowed only three tons of coal.

## Wonders of Aerial Torpedo

### Under Absolute Control, by Wireless to Almost Any Distance.

London.—An aerial torpedo, which can be controlled thousands of miles away, has been invented by Chas. S. Price, a prominent British mechanical engineer.

Carrying a crew, but under absolute control to any distance at which wireless is effective, the torpedo can be used for exploring, attacking or carrying mails. It actually has been used by the British War Office during hostilities for bombing purposes. It makes a bomb which the inventor declares he has practically completed an invention by which the effect of a bomb can be recorded at almost simultaneously with the raid itself, which may take place thousands of miles away.

"The torpedo was travel from 175 to 200 miles per hour, and I can tell at any moment just where it is," said Mr. Price.

The Germans called it the "Devil's ship." One German, who was a sailor in England during 1915, offered me, on behalf of the German Government, \$500,000 for the secret. He was locked up in the Tower of London as a spy.

Price declares he can steer the torpedo to New York, Australia, or any other part of the world from any wireless station in Great Britain.

### British Bishops Coming.

London.—The Bishops of Oxford and Worcester have sailed on the Empress of France for Canada. They are to take part in the celebration at Winnipeg in connection with the transfer of the land known as the Archbishop's Western Canadian Fund and which amounts to \$250,000. The Bishops will themselves formally hand this sum to the authorities of the Anglican Church in Western Canada.

### Quitau Referendum in Yukon.

Ottawa.—A proclamation gazetted last week Monday at 11 o'clock, sets the day on which polling will take place in the Yukon territory, under the Canada Temperance Act provisions on the question of prohibition of liquor. Robert Craig, of Dawson, Y.T., has been appointed returning officer for the taking of this vote.

## SAS ARMERS AND SEDITIONISTS ARE IN LEAGUE

### MEIGHEN SPEAKS AT GRANBY.

### Believes Farmers' Party Has Joined Hands With Malcontents and

Granby, Que.—Addressing a large audience in the open air here, Premier Meighen once more treated of the tariff question and largely reiterated his announcement of the previous evening. At the outset he explained that he was not making any attack on the sitting member for the constituency of Sheffield, George Bovin, who, being deputy speaker, was outside of politics, but he wanted to address them as citizens in Canada.

Mr. Meighen reiterated the previous statement as to the policy of the Government in prosecuting the war and the subsequent policy in the reconstruction period. As far as he was concerned, the problem of reconstruction had been decided on three or four times already. The Premier proceeded to show how the Farmers' party, much less their followers, want to overturn representative government," said the Premier, "and I say that those with whom they have aligned themselves, as for instance, the Winnipeg and Vancouver secessionists, had as their goal the destruction of the system of government in Canada. They almost achieved success in these efforts and, consequently, I say the addition of the group to the Farmers' party constitutes the party which is the most formidable antagonist of the present administration."

Mr. Meighen went on to denounce the attitude of the Farmers' party, and said that Canada suffered from an adverse trade balance with the United States, and argued strongly for a tariff, protective of industries and Canadian workers. He emphasized the increasing industrial importance of this province, which, he said, was rivaled only by Ontario and not surpassed by that province.

## Cheap Apples for Winnipeg

### Mayor Gray Has Inaugurated Plan for Cheap Distribution.

Winnipeg, Man.—The Mayor of Winnipeg will be able to purchase cheap apples next week with the inauguration of Mayor Charles F. Gray's scheme of the group to the Farmers' party announced today that the first carload had been shipped from the Toronto district and should reach Winnipeg by the end of the week.

They will be delivered from door to door in the city, in jute sacks and twenty pound paper sacks. The price will probably be \$2.20 for the forty pound sacks, with a ten cent rebate on the sack, and \$1.12 for the twenty pound sacks, with a two cent charge for the sack.

### Budka Wants to be Naturalized.

Winnipeg.—Right Rev. Nicetas Budka, bishop of the Russian Greek Catholic Church in Western Canada, made application in court before Mr. Justice Curran for naturalization. The case was referred to the secretary of state. Bishop Budka said he was confident the secretary of state would grant the naturalization.

### Wrangel Makes Big Haul.

Washington.—Capture by the forces of Gen. Wrangel, the anti-Bolshevik leader of the new Russian Government, of the Russian fleet on the Danube River, and about 10,000 prisoners, was reported in advices from Constantinople. Several hundred machine guns were captured and a large quantity of supplies, the dispatch added.

### France Will Pay Loan.

Paris.—France will pay loan dollar of the \$250,000,000 loan due in New York, October 15, M. Francois Marval, the minister of finance, offered to make machine guns for the U.S. This sum is France's share of the \$500,000,000 Anglo-French loan floated in the United States during the war.

## ISSUE REPORT ON SHOOTING OF COUN. LYNCH

### SHOT RESISTING POLICE.

### Prominent Limerick Sinn Feiner Meets Death at Hands of Constables.

Dublin.—An official report issued concerning the shooting of Councilman Lynch, a prominent Limerick nationalist, in his hotel room in Dublin has been issued. It says that 12 soldiers accompanied by two members of the Royal Irish Constabulary went to the Royal Exchange Hotel to arrest Mr. Lynch. As they opened the door to Mr. Lynch's room, a shot was fired at them and the military replied to the fire, Lynch falling dead. He was shot through the mouth.

The report states that he was violently resisting arrest when he was killed.

Mr. Lynch's home in Killinlick, frequently had been raided. A moving lorry containing six policemen was ambushed near Limerick by nearly a hundred men. Two military lorries came to the rescue. The attacking party fired and two soldiers are reported to have been killed; 30 arrests were made. Two soldiers and a civilian were wounded, supposedly as a reprisal.

The military authorities have commenced an investigation of the Balbriggan shooting. A public inquiry will be held at which citizens of Balbriggan having knowledge of the trouble will be urged to testify. The "Black and Tans" in the vicinity of Balbriggan, have been ordered confined in barracks.

The damage done by the "Black and Tans" in Balbriggan, in their raids, after the shooting of two police officers in that town, is estimated at \$200,000. Among the damage destroyed by the raiders were the residences of Mrs. Frank White, sister-in-law of Eamon De Valera, and Mrs. Flanagan, brother-in-law of De Valera.

Eight armed and masked men entered the Ulster Bank, Dublin, and held up the staff. They escaped with a considerable sum of money.

"Spies and informers beware," was the label pinned to the clothing of a man found in a field in County Carlow.

## Canada Has Many Phones

### Is Second Among Nations in Use of Telephone Service.

Ottawa.—An interesting comparison showing the popularity of the telephone in Canada has been made by officials of the Bell Telephone Company in connection with the company's application for increased rates, now before the Board of Railway Commissioners.

The figures compiled show that Canada stands second only to the United States in the matter of per capita use of the telephone. The population of Great Britain in a recent report, gave the figure for Great Britain as two telephones for every hundred of population. On the same basis the United States has 1.36 telephones per hundred. Canada comes next with 1.08 per hundred; Sweden, .64; Norway .42; France, .44; Germany (1914), .22; Finland, .10 (1917), .03.

### Labor Pains Approved.

Ottawa.—The methods in vogue in Western Canada for solving the harvest labor problem as outlined by T. M. Molloy, commissioner of labor and industries, Saskatchewan, were enthusiastically approved by the delegates from the U.S. attending the convening session of the International Federation of Great Britain, held in London, last week. The delegates of public employment offices.

### Big Salmon Pack.

Seattle, Wash.—The 1920 salmon pack of Alaska, British Columbia, Puget Sound and the Columbia River is estimated to be 6,055,000 cases, valued at \$600,000, according to revised estimates made public by the Pacific Commercial Fish Brokers' Association. British Columbia's contribution is 1,000,000 cases, compared with 1,336,435 in 1919.

### Ontario Crop Averages High.

Toronto.—Probably the largest fall wheat crops in the history of the province of Ontario were reaped this year, after the terms of the crop. According to the statistics compiled by the Department of Agriculture, the averages are far above previous years, on an acreage of 726,371 acres.

W. N. U. 1335

## Millrand Elected As President of French Republic

### Fuel Situation Is Improving Says Carvell

### Daily Imports From U.S. Have Recently More Than Doubled.

Ottawa.—Much of the worrying which is being done with regard to Canada's fuel supply for the coming winter is needless. That is the view of Hon. F. B. Carvell, chairman of the Board of Railway Commissioners, under whose control cost imports and exports were placed by the Dominion Government during last session.

During the period from April 1 to September 15, 1920, Eastern Canada imported 114,658 fewer tons of anthracite, but 1,852,065 more tons of bituminous coal than in the same period of last year, and as conditions on the other side of the international boundary are improving, so the imports of coal are increasing.

Since the Board of Railway Commissioners took charge of the fuel situation, the imports daily have been more than trebled.

### Trade in Drugs

### Far-Reaching Regulations Affecting the Drug Traffic in Canada.

Ottawa.—By an order registered in the House of Commons, the Government has issued far-reaching regulations affecting the drug traffic in Canada to force immediately. Every doctor, druggist within the Dominion will be so circulated with a view of rounding up drug addicts, and measures will be adopted which will make the carrying on of illicit drug traffic practically impossible.

That the government health officials are sincere in their effort to clean up the drug evil and also that they are enjoying nothing short of wonderful success is shown by some figures given by the Government. In the three months ending June 30 last year, the amount of cocaine imported into Canada was 2,376 ounces, compared with 605 ounces in the same period of 1919. Morphine has dropped from 11,038 ounces to 3,978 ounces and opium from 7,931 pounds to 992 pounds.

## Spent Four Years in Arctic

### Explores Path to Find Any Trace of Blonde Natives.

Nome, Alaska.—Capt. Joe Barnard and A. Anderson arrived here with their vessel, the Teddy Bear, after four years spent in the Arctic, during 25 months of which time they were beleaguered at Taylor Island in Victoria Harbor. The general of Great Britain, Lord Curzon, has been told that Barnard brought with him a native of the land of Stefansson's famous blonde Eskimos, but declared that after four years' search of the Arctic he was unable to locate any of the blonde natives. He found old houses, pieces of old ivory and other curios uncovered in the ruins.

## Claim Bolshevik Victory

### Reels Outcome Series of Villages in Grodno Region.

London.—The official communication sent out by the Russian Soviet Government at Moscow, says: "In the Grodno region our troops repulsed enemy attacks along the whole of the front, and on assuming the counter-offensive opened a series of villages. Red troops have occupied, after Chardul and Bulbusha and have seized the whole region."

### Another Mexican Revolt.

Mexico City.—Gen. Rodolfo Herrero, who was accused of the murder of former President Carranza, when the latter was making his way to the coast, after fleeing from Mexico City, is in revolt against the central administration in the State of Hidalgo, according to word received here.

### U.S. Mail Train Robbed.

South Bend, Ind.—Two bandits held up a screened United States mail train here and secured a number of valuable mail bags, valued at from \$1,000 to \$20,000.

### Versailles.—Alexandre Millrand was invested with the executive powers of the eleventh presidency of the French Republic before the assembled Versailles Congress, 10 minutes after Leon Bourgeois, president of the Senate, had proclaimed him elected, without the usual formality of receiving the powers from the hands of the retiring president.

Mr. Millrand received the greatest ovation at Versailles ever given a president. Surrounded by deputies and senators he was greatly moved. "Victorious France must rebuild its ruins and repair its wounds," he said, "we must constitute a foreign policy worthy of our country, and our ideal."

Any opposition to the election of M. Millrand was expected to come from elements which are not in accord with the announced purpose to secure a revision of the constitution, that will enable the president to play a more active role in the government than has been usual in the past. Leon Bourgeois and Raoul Peret, presidents respectively of the Senate and Chamber of Deputies, declined to permit their names to come before the joint caucus, and no other candidates were brought forward.

## Want Menace Removed

### Veterans Object to U.S. Cruiser on Coast of St. Lawrence.

Kingston, Ont.—The United States Government has a cruiser on the St. Lawrence with guns mounted for the purpose of suppressing violations of the law. According to a protest of the local branch of the Army and Navy Veterans, who have come to the attention of the Federal Government, that this is a violation of the treaty between the United States and Great Britain. The Veterans say the ships of war on narrow waters of the St. Lawrence is a menace to shipping and Canadian homes.

## Fatal Airplane Accident

### Engine Stopped When Aviator Attempted to do a Spiral Nose Dive.

Ottawa.—E. G. Avey, a prominent jeweler of St. Lawrence, Quebec, was killed and killed Jack Drummond, of Ottawa, painfully injured, when, in full view of hundreds of visitors to the Shawville Fair, according to a report of the local branch of the Army and Navy Veterans, who have come to the attention of the Federal Government, that this is a violation of the treaty between the United States and Great Britain. The Veterans say the ships of war on narrow waters of the St. Lawrence is a menace to shipping and Canadian homes.

## Montreal Has Bomb Explosion

### Not Thought That Incident Has Any Connection With Red Activities.

Montreal.—Early Thursday morning the neighborhood for blocks around St. Timothy street, near St. Catherine street east, one of the busiest thoroughfares in the city, was shaken by a bomb explosion. The house in St. Timothy street where the explosion occurred, was practically destroyed. Every window in the house was shattered and bricks of the immediate vicinity were also badly damaged.

### Toronto Bans Sinn Fein Meetings.

Toronto.—No meeting of sympathizers with Sinn Fein will be permitted in this city, according to an announcement made by Acting Police Chief Dickson. As a result of many protests against a meeting which the Self-Determination League for Ireland, in Canada, proposed to hold this week, and a suggestion from Mayor T. H. Church that it would not be advisable to allow the meeting, the Board of Police Commissioners has definitely decided to put the ban on it.

## Additional Bow Island

From our own Correspondent

Mrs. Mildred Prouse and her sister Mrs. Carson have returned to Bow Island after having spent the last few months at the Coast and are visiting at the home of their parents Mr. and Mrs. Prouse.

The Ladies Aid met at the home of Mrs. McWilliams last Thursday. They met in the Rest-Room on Thursday evening to sew rugs, they intend having a sale of work in the near future.

Mr. and Mrs. A. Nelson and Mrs. George Riddedale motored to Medicine Hat on Wednesday, Sept. 21.

Mrs. J.C. Whitehead left last week for Sask. Mrs. J. Martin accompanied her as far as Medicine Hat.

The Lansell School opened on Monday Sept. 20th. Miss Fisher is the teacher.

An accident happened on the railway track last week when the axle of the freight train broke and the wheel came off, no damage was done beyond smashing some ties and displacing the ballast of the road-bed.

The Ladies Auxiliary met in the Club Rooms last Saturday nine new members were received.

Francois Halloran and Louella Horvick will leave on Saturday for the convent in Medicine Hat.

Mrs. J. C. Whitehead is in Bow Island again.

Miss Fisher spent the week end with her parents in the Hat.

A Rally Day Programme was given by the children in the United Church last Sunday morning, there were a large number present. Mrs. Russell played the organ. Bibles were presented to Leslie Smith, Edna and Dolly Browning for faithful attendance. Lawrence Rolfe, Eunice Rishworth and Gladys Hunsley were presented with books for faithful attendance.

Mrs. B. Hinds, J. Whitfield, G. Calder and A. Speis were business visitors to Lethbridge last Monday.

Born to Mr. and Mrs. J. Hatcher on Sept. 28th, a daughter.

Fan Chuen has returned from China and is working in the store again.

Mrs. Bernon left on a trip last Tuesday for the East.

Mrs. Ostum held a reception for Mrs. F. Brophy last week.

When going out on the south road last Sunday, Harold Smith and Theodore Kirch were thrown out of the car, but were not hurt. The car was pretty badly damaged.

## Notice

Mr. C. E. Johnson has rented his Store and intends to stay on the farm, and wishes to thank all his patrons for their liberal support during the time he was in business.

Mr. and Mrs. Blaine were in Calgary, attending the Druggists Convention last week.

Mr. and Mrs. F.W. Tweedle went to Medicine Hat last Friday to take their son to the Hospital there, who had an ankle bone splintered and the flesh badly bruised when a horse fell on his leg; he will have to stay at the hospital for about two weeks, it is hoped that he will have the use of his leg after his return.

Archie Houghlin is home again for a short time.

## Notice

An Address will be given by Mr. Clifford Roberts in the L.O.O.F. Hall, Bow Island at 8 p.m. on Monday 4th, October.

## United Church

Sacrament Sunday 3rd, October at the United Church.

Sunday School at 11 a.m.

Church at 7:30 p.m.

Mr. and Mrs. D. Champion of Orion went Wednesday and Thursday the guests of Mr. and Mrs. A. E. Kindall.

Mrs. Low Gulan and baby accompanied Mrs. LaClair as far as Medicine Hat, Mrs. LaClair is leaving for her home in Gladstone, Mich. after spending the last month with her sister.

Mrs. E. Munro of Winnifred was a business visitor here last Tuesday.

## NOTICE

In the Estate of John Gottfried Johnson, Farmer, deceased.

Notice is hereby given that all persons having claims against the estate of the above named John Gottfried Johnson who died on or about the 27th day of January, A.D. 1920 are required to file with Charles Elmer Johnson of Bow Island, Alberta, Administrator of the said Estate, by the 8th day of November, A.D. 1920 a full statement duly verified of their claims, and of any securities held by them and that after that date the administrator will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

Dated this 14th day of September, A.D. 1920.  
Prowse & Lyons of Bow Island, Alberta, Solicitors for the Administrator.

## DATES for AUCTION SALES

If you intend to have a Sale, be sure you leave the date at Review Office, Bow Island for D. M. Garrison, Auctioneer.

Notice the dates of following Sales.

Don't forget the Auction Sale at Robert Burris' farm 3 miles West and 1/2 mile South of Bow Island to be held on the 5th, October, 1920.

Also Mrs. E. Munro, 6 miles East of Bow Island, on 14th, October.

Don't forget the Date, of Aart Brouwer's Sale on the 11th, October.

James L. Larson Auctioneer

## PROWSE & LYONS

Barristers, Solicitors, Notaries Etc.  
Office next to Post Office.  
Bow Island every Friday afternoon and all Saturday.  
Taber, Alberta.

**For Sale**  
Horse, Buggy and Harness  
for sale — Cheap \$80  
Apply Review Office  
Bow Island

## Sows for Sale

One Sow and four young pigs also one Sow and six young pigs, also ten young pigs 4 months old.

Apply James Glover  
Half a mile West from Bow Island

## For Rent

A two room Shuck with gas laid on, barn, chicken house, on two lots, fenced.

Apply Review Office Bow Island

## NOTICE

In the Estate of John Horwood Paterson late of the Town of Bow Island in the Province of Alberta, Physician, deceased.

Notice is hereby given that all persons having claims against the estate of the above named John Horwood Paterson who died on or about the 24th day of April, A.D. 1920 are required to file with Messrs. Prowse & Lyons of Bow Island, Alberta, solicitors for Alonzo Frank Werts and Robert M. Paterson, the executors, by the 8th day of November, A.D. 1920 a full statement duly verified of their claims and of any securities held by them, and that after that date the executors will proceed to distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been filed or which have been brought to their knowledge.

Dated this 14th day of September, A.D. 1920  
Prowse & Lyons of Bow Island, Alberta, Solicitors for the said Executors

**Hide in Lifeboats,  
Subsisted for a week  
on biscuits**

VANCOUVER Sept. 14—When the C.P.O. liner Empress of Russia docked here she had on board two stowaways. Oscar L. Hyatt, 21, of El Paso, Texas, and R. Allen, 21, of New York. The two young men hid in one of the lifeboats and subsisted for seven days on biscuits stolen from the kitchen and water taken from the lifeboat's emergency tanks. The steady intruder on the biscuit supply led to the discovery of the stowaways.

## The Weather September 1920

Friday 24th.	Dull and cool in forenoon, sunny and warm in afternoon.
Saturday 25th.	Dull and cool.
Sunday 26th.	Sunny and windy.
Monday 27th.	Cloudy and windy.
Tuesday 28th.	Sunny and Warm.
Wednesday 29th.	Cloudy and windy.
Thursday 30th.	Sunny and hot.

# Schools of Agriculture Making for Efficiency Of the Coming Farmer

The world has no place to-day for the underfed man or woman, neither for any excess of food that has not had some schooling. Schools of various conditions and kinds are opening up on every side. In the various cities of Canada, first class night schools are run regularly during the winter months, which are opened to boys and girls alike, while in the country, there are technical schools, where boys and girls are taught everything needful to enable them to make a success of life.

In 1914, the Province of Alberta had established—at Vermilion, Claresholm and Olds—provincial schools of agriculture. In these, are four; to-morrow there will be six, one each at Raymond and Gleichen, opening in connection with the irrigated demonstration farms already established there. They have as principals, practical experienced farmers, who have as their assistants, strictly practical specialists. All lines of agricultural education, livestock, poultry, carpentry, farm machinery, dairying, crop selection, soil chemistry and soil preparation that will give the boy such knowledge and practice that will enable him to make the business of farming a pleasant and more profitable occupation.

Every progressive country now recognizes the necessity of giving its boys and girls the best possible educational advantages in preparation for whatever life they may elect to follow, and here is education along aggressive and practical lines. By locating these schools on government demonstration farms, practical demonstration of subjects discussed daily in the schools are available, and the assistance of the farm superintendents is at hand. In addition, some 20 acres on each farm are set aside as experimental plots, which are under the cultivation and care of the students.

Could the hired man or boy of earlier days take up the farmer's carpentry tools and turn out a much needed wagon-box in workmanlike manner? Could he weld a gate, or a hundred and one other repairs that are required in the operation of a farm?

Could the hired man of earlier days handle the smith's forge and properly shape a plow-shaft? Manufacture a chain? Bend up a hook? A wagon-box iron? Weld a connection? Care for the horse's feet and shoe him, and other frequently required repairs that are part and parcel of farm life.

Could the hired man tell what a thoroughbred bull or dairy herd, a champion stallion, when he is asked, or prescribe treatment to restore it to health and productivity? Or judge your cattle and horses for breed and quality? Of course he couldn't.

## Canada and the Seven Seas

British Columbia Shipping Assuming Large Proportions.

The Minister of Marine for Canada states that the export trade from British Columbia is only in its infancy. The Government are at present running ships from Vancouver to Australia and New Zealand and also to the United Kingdom. These ships so far have had no difficulty in obtaining large cargoes of goods. The Canadian Merchant Marine will operate a line to India on November 1st. They have also under consideration running ships from British Columbia ports to West Africa, to South America and the West Indies. When all their ships are completed the Government will be operating a fleet of 120,000 net tonnage which will be operated from British Columbia ports.

## Rubber Trade Hurdled Year Old.

The hundredth birthday of rubber as an article of commerce was celebrated on June 11th last, says London Tit-Bits. In the spring of 1840, John J.oung of "cascobins" (pronounced co-ko) to give India rubber its original name—began arduous work in Brazil, but solely as curiosities.

Teacher—"Name something of importance existing to-day that was not in existence 100 years ago."  
Small Pupils—"Me."

# Maps And Their Making

Britain Has Been Very Carefully Chartered to Small Details.

Map making is an industry that is little known, although extremely important, says Tit-Bits. The oldest map in existence is in a museum in Turin. It is a fragment of a map of the world, with lines and quaint markings, and was given to the river, the crocodiles and fish, swimming in them. It dates from 1700 B.C.

There is a curious map of the world in the library of Hereford Cathedral. It is six feet four inches high, and five feet wide, drawn on vellum, and enclosed in a case with folding doors.

Map making has now reached such a degree of perfection and accuracy that one can locate every tree in the most remote village in the United States.

The whole of the British Isles have been surveyed and charted by the Ordnance Survey since 1824, and this work goes on throughout the year. At the headquarters of the Ordnance department at Southampton you can see the work of map making being carried out by the surveyors.

The process is roughly as follows: First the land must be surveyed. Every inch of a district must be measured and every curve and angle being carried out by the surveyors. The size and area of every object must be found, and the point of the compass or direction which these must be gauged and recorded. Then the field work is completed, the map is drawn. The surveys are on different scales—one inch, two inch, six inch. Some of the towns have been surveyed on a scale of twenty-five inches to a mile. These maps show every house, ledge, or tree.

The engraving of maps is done on copper plates. It is possible for old plates to be skillfully revised and altered, and some of the maps have been printed since to be done from lithographic stones, but these have now been discarded for aluminium plates, which, when coated by a certain process, produce a much more accurate and sensitive medium.

By the use of different aluminium plates it is possible to print many colors. The printing is done on paper seasoned by exposure to the air.

It is no uncommon thing for thirty or forty draughtsmen to be employed on one map. One man may be a specialist in outlining drawings, another in indicating natural features of the country, etc., and so on.

The marvelous clearness of each map is a point which may be due to the fact that it can be drawn on a very large scale, and later reduced by photography.

The most extraordinary map ever made is in the Louvre. It was presented by the late Czar of Russia to the French nation.

This map is made of gold and studded with jewels, and was signed by a skilled Russian engraver. Its value is supposed to be about \$150,000. This map is about three inches along each side, and is framed in slate colored jasper. The sea is represented by pale marble, and the cities and towns by precious stones.

## Employment for Returned Soldiers

Physically Sound Veterans Now to Have Civilian Status.

That the employment of returned soldiers physically fit should be re-emphasized in the future to a civilian basis is the policy now adopted by the department of soldiers' civil re-establishment. Now that the employment of returned soldiers has been practically completed its work, it is felt that the regular labor agencies should take up the work, and that the returned men who have all their faculties should be treated as civilians and not as ex-soldiers.

This is not meant to apply strictly to such as have been in military hospitals. Some 4,000 patients are still being treated, of these 1,500 are incurable, 1,000 insane and 100 are incurable. The others are mostly surgical cases.

## Manitoba Wheat.

Manitoba's wheat crop this year is worth approximately \$117,500,000 to the producers. This is the estimated value reached by computation based on the report of the provincial Department of Agriculture on crop conditions. This gives an average yield of 17.5 bushels to the acre, and an estimated average gross wheat of 2,687,000 acres, giving a total estimated crop of 47,022,500.

# The West's Big Crop

This Year's Wheat Yield Estimated at 289,000,000 Bushels.

The Dominion Government estimates that the yield of wheat in the three prairie provinces this year will be 289,000,000 bushels as compared with 193,000,000 bushels in 1918. It is also estimated that the total yield of oats will be 356,000,000, of barley 60,000,000 and of flax about 8,000,000 bushels.

Manitoba's yield of wheat is estimated at 40,000,000 bushels; Saskatchewan's, 136,800,000; and Alberta's, 82,972,000. The Manitoba yield is a decline of about half a million bushels, but Saskatchewan and Alberta and the east are up about 45,000,000 bushels.

Alberta will have the largest crop in the history of the province. The total wheat crop in 1915 was 60,000,000 bushels valued at \$50,000,000. In 1919 the yield was 34,575,000, valued at \$63,500,000. The latest federal crop report of this year's crop is 82,972,000 bushels, which, taken at say, \$2.60 a bushel, will bring Alberta farmers the huge sum of \$215,727,200. This means that the wheat crop of the bumper yield of 1915, will, this year, be increased over four-fold in monetary value, assuming that approximately the present price of wheat holds.

Returns from threshing in Western Canada give proof that the grain crop is grading much higher than has been the case for a number of seasons past. This is one of the factors which will render the Western crop more valuable than usual and will constitute surprises for a great many farmers who earlier in the season thought that the outcome of this year would be very unsatisfactory.

From earlier in the concluding weeks of August or the beginning of September have been a prolific source of reduced grades in the past. The northern parts of the provinces and greater part of the west has been fortunately free from frosts at a season when serious damage could be inflicted on the grain. The circumstances under which the crop was raised were for the farmers of Western Canada. At the prevailing price of wheat this would mean about the hundred million dollars distributed among the population of the three western provinces for wheat alone.

## Wealth of Northland

Over 2,500,000 Bushels Grain in Northern Alberta.

Between two million five hundred thousand and three million bushels will be the total yield of all grains in the country north of Edmonton, including the area of the Edmonton, Dugway and British Columbia, and the Alberta and Great Waterways line, according to estimates prepared by railway authorities.

The whole will be of an exceptionally high standard in regard to quality, and railway officials anticipate that the northern railway systems will be in a good state of repair and entirely adequate to remove the 1920 grain crop.

Splendid crops are reported at Peace Coulee, at Lake Saskatchewan and in the Grand Prairie District. Territory lying between Peace River and Spirit River, in the Celebrated Waterhole district, are termed wonderful by farmers themselves. As far north as Fort Vermilion, excellent crops are also said to exist, with cutting operations proceeding apace as a result of the present favorable weather conditions.

Threshing has started in many places and its completion will considerably increase the yield. The estimate given above is, of course, an approximate one. At the same time, however, railway officials declare it to be conservative.

## U.S. Adminers On Housing Plan.

A special article on the housing question is published in the New York Times, regarding the size of a "hook," as it were, "to what Canada has done." Writing from Ottawa, the World special correspondent

"Our business-like little neighbor has tackled the housing problem and taken a fall out of it."

W. N. U. 1335

# Manitoba Community Clubs Doing Splendid Work in Rural Districts

To develop in the members of the community the art of living together in the spirit of the golden rule is the high ideal of the community club movement in Canada. Excluding any suggestion of sectarianism, sectarianism, the organization, though yet in the first stages of growth, has been of inestimable benefit to the citizens of every community in which a branch has been established, especially in rural districts. Through the inoculation of its aims and ideals a spirit of co-operation has been formed among the many and varied institutions of country districts which has resulted in the progress of the community clubs, the sharing of community tasks, and the betterment of community conditions. The inception of the community club idea in Manitoba was spontaneous, and there are already existing in the province thirty-four organizations in a flourishing condition. The work of the clubs has been twofold, benefit in the rural districts, where the isolation and lack of social intercourse so often accompanying the rural life, and the attainment has been largely offset by the workings of the club, and the hardships which often accompany pioneering have been softened by the golden rule of the club. But it was in the older settled sections is immense and of wide scope. To help improve living conditions, to make life more wholesome, more attractive, and more complete, this has been, and is, the chief aim of the community club in the farming districts. The club has been instrumental in providing lectures from the universities and in seeing that there were substantial audiences present to hear them; agricultural chautauques have been staged in a number of places; debates on problems of public interest have been held. Valuable work has been done among the younger generation—Boy Scout troops organized, classes of evening study started, day camps held, and all kinds of team sports prepared and carried out. Working in co-operation with the Public Health Board, questions on matters of health and hygiene have had the attention of the clubs, discussions arranged, lectures arranged, and active work done in the dissemination of educational propaganda.

## Industrial Growth of West

Just Beginning to Realize the Potential Wealth of the Prairie Provinces.

Industrial development in Western Canada is proceeding at a rate little appreciated by the people generally. The provincial governments in the prairie provinces are realizing as never before the possibilities of their natural resources. To-day there are more than 700 members of the Canadian Manufacturers' Association located west of the Great Lakes, whereas in 1910 there were 142. There are 208 factories in actual operation in Alberta giving employment to 3,171 people. In Saskatchewan, 1918 there were 142 manufacturing establishments with a capital of \$39,476,000, employing 8,188 persons and having a value added of \$1,420,000 that year. The known mineral resources of Saskatchewan include natural gas, sodium sulphate, sodium chloride, lead and potash, coal, clay, and petroleum. The fisheries resources of the prairie provinces represent a potentiality of great value and are awaiting development. It is estimated that a railway built to Meadow Lake would bring out at least 300 carloads of fish from the northern lakes of Saskatchewan each season. A crew of four fishermen last year caught 300,000 pounds of fish in Buffalo Lake alone. Buffalo Lake is only one of the many smaller lakes in the northern part of Saskatchewan.

## China's Coal Fields

Could Keep World in Fuel for Many Centuries.

The discontented British miners would do well to read, mark, learn and inwardly digest the fact that France has just bought 100,000 tons of coal from the Chinese government. This "deal" synchronizes with the advice given by all the South Africa shipping lines to burn coal from the transvaal mines, and is an indication of the trend of things incident to the exorbitant demands of labor. China's coal supply is practically inexhaustible and is virtually untouched. She has enough good coal to supply the needs of her own people at its present consumption of a billion tons a year for a thousand years. The coal-bearing areas of China, which have been estimated at more than 200,000 square miles, a territory twenty-five times the size of Wales, and it is a remarkable fact, that, instead of being limited to a few favored districts, this vast supply of coal is found all over the Empire and in every province.

## A Heavy Touch

Farmers to Pay \$14,000,000 on Wheat Charges.

Calgary, Alta.—The increased freight rates will make it costly for the farmer shipping his wheat to market. Grain shipments from Calgary to the head of the Great Lakes will cost the shipper of wheat just 60 cents per one hundred pounds. On shipments to the coast the cost per 100 pounds has risen to 52 cents. It has been figured that Alberta farmers alone will contribute \$14,000,000 additional to the railway as a result of the new rate.

## Alberta's Resources

Agricultural Resources Greater Than Those of France and Germany Combined.

When the problem of separation of oil from the oil sands lying to the north of Edmonton, Alberta, has been solved, the oil quantities available to supply the world for six hundred years will be released. This opinion was expressed by Dr. H. M. Torgy, principal of the University of Alberta, in the course of an address before the Calgary Board of Trade recently. Dr. Torgy stated that a member of the faculty of the University of Alberta was working on the problem of separation for ten days and that if he continued his work, he would be able to supply the world with oil. He had done so, but the problem would be solved in six weeks. The oil fields north of Edmonton, the principal of the University of Alberta, contain the greatest body of oil to be found in the world. Speaking of the oil sands, Dr. Torgy stated that the coal fields within a radius of fifty miles of Calgary are adequate to supply the chemical industry of the whole of Canada. "The agricultural resources of Alberta are greater than those of France and Germany combined," said Dr. Torgy, "and the University of Alberta was producing ninety per cent. of her own food requirements for 60,000,000 people from one hundred and thirty thousand acres of land. The province possesses of such resources should be found it necessary last year to import food for stock seems incredible. It is to be hoped that such a necessity will never occur in the future in Alberta."

## Good Crops in B. C.

Crop of Hay Yielded Five Tons to Acre.

Heavy spring rains and beneficent sunshine in July and August have coaxed from the fertile soil of British Columbia, and especially Lulu Island, one of the best crops garnered in years.

A Vancouver report states that the grain crop at its present stage may be seen some of the finest crops ever grown anywhere. Near Branscombe is an oat field where the blunder of the oat stalk is a goodly grain being so high and heavy that a fall cut choked the machine and the sheaves would not go under the wheels. This field will yield well over 140 bushels to the acre. Wheat in the same vicinity should reach 60 bushels, while the oat field which may have any crop would turn an experimental farm expert green with envy. Reeve Bridge, of Richmond, boasts a crop of wheat which, while it makes other records look small. From 36 acres, 180 tons were cut, or an average of five tons per acre. At \$34 a ton this looks like \$4,680.

## The Ks-Kaiser's Will.

William of Hohenlohe, former German emperor, has written a new will, which will be in his testament. He has entrusted it to the keeping of North School, at Anneringen, says a Dorn dispatch to the Daily Mail.
